## Profile

---

A self taught designer and developer with experience in creating bespoke WordPress sites, server maintenance and setup, and front end development. I'm a creative, self starter who is eager to learn and thrives in a creative environment, and I'm a nerd - and every office needs a nerd.

## Employment History

---

### Web Developer, Kula Partners

Halifax, Nova Scotia

Oct 2023 – Feb 2026

Creating bespoke WordPress sites based on client's needs, brand guides, and internal designs. Content updates, Hubspot landing page creations. Monthly upkeep on sites, and server migrations.

### Web Developer, Wicket Industrial

Ottawa, Ontario

June 2022 – June 2023

Creating bespoke WordPress pages integrated with Wicket's organization platform. Test and fix any content and front end issues, ensure all is in compliance with accessibility guidance.

### Wordpress Developer, SEO Works

Sheffield, United Kingdom

July 2019 – March 2022

Creating bespoke WordPress/WooCommerce sites from in house designs and to client's needs and requirements. Deployment to various hosting platforms, maintaining git repos for all projects. Robust testing of websites using various tools such as Browserstack, Responsively, and Google Page Insights. Client training, support, and monthly security retainer checks.

### Front End Developer, Switchstance

Sheffield, United Kingdom

Sept 2017 – Nov 2018

Creating responsive websites from designs, and cross browser testing using Browserstack. Setting up and maintaining servers, and ensuring they are secure. Ensuring WP installs are up to date, and backups are being created using a cron and AWS. Client support and maintenance.

### Junior Front End Developer, Airship

Sheffield, United Kingdom

Feb 2015 – Aug 2017

Maintaining existing sites created in WordPress, Expression Engine, and Craft CMS systems. Setting up and maintaining servers, and ensuring they are secure. Creating responsive websites from designs, and cross browser testing.
